Education

Northeastern University, Khoury College of Computer Sciences — **Expected Graduation May 2028**
BS in Computer Science (GPA 3.45/4.00) — **Boston, Massachusetts**
Concentration in Human-Centered Computing and a Minor in Business Administration
Relevant Coursework: Object-Oriented Design, Algorithms and Data, Cybersecurity, Human-Computer Interaction, Harvard CS50, Calculus II, Web Development, Data Science, Discrete Mathematics, Computer Systems, Financial Accounting, Marketing
Activities:

- **Historian of Delta Kappa Epsilon:** Maintained historical records and archives within the Fraternity. Advised executive board based on historic documentation to support informed decision-making.
- **Vice Chair, AI Advisory Board at the Student Government Association:** Advised University administration on strategies to expand AI literacy and support integration of AI into the classroom.
- **Technical Lead at Google Developer Group:** Conducted 30-person workshop on Google's Gemma & Gemini APIs.
- **Vice President at Turkish Student Association:** Re-founded org, wrote constitution, recruited 50+ members, hosted 20+ cultural events.

Work Experience

Monk AI Group monkgroup.ai — **December 2024 – December 2025**
Lead Frontend Developer & Lead UI/UX Designer — **Boston, Massachusetts & London, UK**
Developed, programmed, and shipped 60+ bespoke AI solutions for enterprise customers. Achieved an average 45% reduction in operational costs for multi-million-dollar clients while maintaining exceptional satisfaction rates.

The Istanbul Chronicle theistanbulchronicle.com — **October 2021 – May 2022**
Lead Software Developer — **Istanbul, Türkiye**
Founding member of Türkiye's largest independent student-founded newspaper. Oversaw the software development department of four developers. Designed, programmed, and maintained the newspaper's website.

Wingie Enuygun Group wingie.com — **July 2021 – September 2021**
Full-Stack Software Engineering Intern — **Istanbul, Türkiye**
Interned at a global travel technology company serving millions of users. Proposed and presented technical solutions to company executives. Developed an internal microservice and collaborated with senior front-end and back-end developers.

Projects, Service & Honors

Third Place Globally in the NASA Space Settlement Contest — **Sep 2021 – June 2024**

- **Honor:** Awarded **third place globally** among 26,000+ contestants and 4,000+ entries representing 19 countries.
- Authored a 50-page paper as part of a team of 7 over the course of 2 years. Designed a theoretical space mission aiming to move humanity to a permanent free-floating space settlement.

The IBPS Programming Language ibps.itsbaris.com — **November 2022 – June 2024**

- Created the IBPS programming language tailored for International Baccalaureate Computer Science students.
- Built an online educational platform where students can write, share, run, and test their code. Expanded adoption to schools in 20+ countries, with a top secondary school integrating it into their Computer Science curriculum starting in Fall 2023.

ThreAIT (Research Project) — **November 2022 – December 2023**
AI Research Assistant — **Paris, France & Istanbul, Türkiye**

- Developed a computer vision model for detecting prohibited items in X-ray security screening. Built and evaluated deep learning models. Supervised by Mehmet Ozgur Sahin, senior scientist at CEA Saclay Irfu, Paris-Saclay University.

Skinscan — **June 2022 – September 2022**
Global Finalist for the Uber Global Hackathon

- **Honor:** Competed in Uber's computer science hackathon. Placed **top five globally**.
- Programmed an AI-powered mobile app that diagnoses skin conditions based on a photo of the affected area. Created a demonstration video and presented the project in front of a live panel of judges from Uber.

Massachusetts Institute of Technology — **October 2021 – August 2022**
Service Project: Turkish Translation of MIT AppInventor — **Cambridge, Massachusetts & Istanbul, Türkiye**

- Volunteered to translate educational tool into Turkish, making the platform accessible to thousands of Turkish students.
- Managed a team of 5 translators. Facilitated regular communication through weekly online meetings with MIT AppInventor leaders.

Skills

- **Languages:** Turkish, English, German
- **Programming Languages:** JavaScript, TypeScript, Python, Go, Java, Kotlin, Rust, Solidity, SQL
- Prompt Engineering and Agentic AI
- **Software and Technologies:** React, Next.js, Svelte, Express.js, Nest.js, Flask, Prisma, Bun, Tailwind CSS, Microservices, REST APIs, GraphQL APIs, JWT, Git/GitHub, Figma
- **AI/ML**: TensorFlow, PyTorch, OpenAI APIs, Gemini APIs
